PRACTICE EXCLUSIVE TO ORTHODONTICS

ORTHODONTICS – THE SERVICE

I am delighted to offer you and your patients a private referral clinic for Orthodontics at Alpha House Dental Practice.

Your patients will receive their Orthodontic treatment in a relaxed environment using the latest techniques and equipment.

An initial consultation will be arranged with your patient for a comprehensive assessment and to discuss treatment options. They will be given a detailed explanation of all the treatment options available, and procedures involved in their treatment. Following the consultation, they will be sent the treatment plan including costs and approximate treatment duration.

During their course of orthodontic treatment, patients will be asked to see their referring dentists for routine check-ups, hygiene visits and any other treatment they may require.

On completion of their orthodontic treatment, your patient will be returned to you for their on-going general dental care – according to your referral instructions. Patients and referring dentists will be able to contact me or the Practice Manager should any queries arise before, during or after the orthodontic treatment is undertaken. Your patient will only be offered treatment for which they have been specifically referred.

ALL TREATMENTS ARE CARRIED OUT USING A WIDE RANGE OF UP-TO-DATE TECHNIQUES AND EQUIPMENT

The specific services to you and your patients include:

- 🏠 Invisalign
- 🏠 Fixed Braces (Metal and Ceramic)
- 🏠 Incognito Lingual Braces
- 🏠 Removable Appliances
- 🏠 Functional Appliances
- 🏠 Interceptive Orthodontics
- 🏠 3M Digital Bonding

The Service we are offering to referring dentists and patients:

- 🏠 Patients will have a full consultation including clinical and radiographic examination based on the nature of the referral.
- 🏠 Patients will be fully consented for any treatment proposed and subsequently undertaken.
- 🏠 Patients will receive a written treatment plan outlining costs and the number of proposed appointments.

- W Patients will receive a high standard of care and treatment using modern equipment and materials.
- W Patients can contact us before, during or after their orthodontic treatment, should any queries arise. Likewise referring dentists can contact us regarding their patients' progress.
- W Referring dentists will be kept informed of their patients' progress.
- W A discharge letter and a copy of the final radiograph, if appropriate, will be sent to the referring dentist upon completion of each of their patient's orthodontic treatment. The patient will also receive a copy of this.
- W No other treatment other than that for which the patient has been referred will be undertaken.

I am very happy to see patients for an initial consultation and every patient will receive an individualised treatment plan. Should your patient not be suitable for orthodontic treatment, they will be returned to your care with options for a suitable alternative.

REFERRALS

Referring dentists may use the referral form included in this pack, scan this QR code or complete an online 'referral form' via the website at: alphahousedentalpractice.co.uk
Please send all radiographs via post, encrypted email or the electronic form.

Following referral patients will be offered a consultation appointment for assessment. At this appointment, they will be fully informed of the procedure and will receive a written treatment plan outlining costs and the number of proposed appointments.
